

LogicTrade™

A Fully Automated Trading System for The \$4 Trillion Daily Forex Currency Market

The Forex Market

Foreign exchange ('FOREX') is the largest financial market in the world with a notional value of approximately \$4 trillion in daily trading volume. Rather than being traded on an established exchange such as the Chicago Mercantile Exchange or NYMEX, spot currencies and currency swaps are traded virtually around the clock through electronic trading networks that connect the major banks, financial institutions, private investment funds and trading firms. Until the advent of automated trading systems, FOREX was considered essentially off-limits for most individual investors due to the high-level of risk involved and the expertise required to trade profitably amid extreme market volatility. However, when traded through automated software systems such as **LogicTrade™**, FOREX is now emerging as an essential asset class for all sophisticated investors to own since it has the potential for superior returns and provides portfolio diversification to an asset class that is not at all dependent upon the stock market.

LogicTrade™

LogicTrade™ is a fully automated trading system that uses a variety of proprietary algorithms and trading strategies to bring world-class FOREX expertise to your account. LogicTrade™ is a proven and reliable solution that has been traded commercially for over three years in approximately 200 accounts with assets under management exceeding \$40 million.

Key distinctives of LogicTrade™ include:

- Preservation of your principal capital is the key tenet of LogicTrade™. Typically only 2% or less of your initial capital is utilized to take live positions. With larger accounts, as little as .5% down to .25% is deployed.
- LogicTrade™ is not dependent on economic fundamentals or technical analysis. The LogicTrade™ engine follows whatever pattern or trends the market is providing and profits in both long and short positions.
- Typically, 65% of all trades are profitable trades. Gross profit on winning trades and gross loss on losing trades are roughly equivalent, yielding excellent month-over-month profitability. Please see the performance pages on www.InterglobalForex.com for examples or call for more detailed analyses.
- Intra-day volatility is a benefit to LogicTrade™ as the proprietary algorithms seek out incremental profit targets regardless of whether the markets go up or down. LogicTrade™ had some of its best days during Sept/Oct 2008 meltdown and the May 6, 2010 "Flash Crash."
- Large markets are an advantage to LogicTrade™ and there is no maximum principal limit.

Your Account

With an IGFX LogicTrade™ account, you will have full control and visibility over your account at all times.

- Depending on your opening capital amount, you will either open and fund your own separate account or have your capital aggregated into one of our commodity pools. The application process is easy and direct with our FOREX electronic trading network providers—with our assistance. Interglobal Forex, LLC never takes fiduciary possession of your funds and has no access to your account.
- LogicTrade™ automatically sends trading signals directly to the trading network on behalf of your account – you don't have to enter trades or call a broker.
- A Web-based account management and reporting application gives you 24/7 access to your account data including principal balance, trade history and complete performance reporting. All trades are settled automatically and posted to your account daily.
- There's no management fee, no commissions, and a minimal lock-up period with minor penalties for withdrawal. High watermark provisions also protect your capital. You have complete control over your account at all times to add funds, take profit distributions, reduce principal capital deployed or close the account.

About Interglobal Forex, LLC

Interglobal Forex, LLC ("IGFX") is the worldwide exclusive licensee of the LogicTrade™ Trading System...a proven, proprietary and highly profitable FOREX solution. We treat our clients as partners and only earn a performance allocation fee if your account makes money each month.
